

# AIMS CENTER playshops

2022-23

AIMS PLAYshops are dedicated to playful learning with creative materials. Using a maker-centered learning framework, we explore tinkering, collaboration, and design with a variety of tools and technologies. Each PLAYshop invites participants to share their own ideas, artifacts, stories, and experiences. We will use this collaborative experience to explore how to design learning-through-making experiences that are interest-driven and equitable for young people.
